SMO Interface 2026: First Workshop on Statistics, Machine Learning & Optimization

Organized by *SQC-OR Unit*

Indian Statistical Institute, Delhi Centre

This three-day workshop presents lectures and discussion in the **intersection of Statistics, Machine Learning and Optimization**. Modern statistical and machine learning methods and applications often require solutions that turn out to be complex optimization problems. At the same time, recent developments in optimization increasingly incorporate stochastic and data driven components to better reflect real-world scenarios. This workshop aims to provide a forum for interaction between researchers from these disciplines, encouraging complementary approaches to tackle applied problems together. The workshop will cover contemporary topics, including stochastic portfolio optimization, deep learning, e-commerce optimization, optimization in policymaking and other cutting edge areas.

EVENT LOGISTICS

Date: 10th to 12th September, 2026

Time: 3 Days

Place: INDIAN STATISTICAL INSTITUTE, DELHI,
7, S. J. S. Sansanwal Marg, New Delhi – 110016

Venue: Conference Hall

ORGANISING COMMITTEE

- Dr. Kaushik Jana, ISI Delhi
- Dr. Sujeet Kumar Singh, ISI Hyderabad
- Dr. Tanmay Sen, ISI Kolkata
