

Economics Seminar, Indian Statistical Institute, New Delhi.

SPEAKER: Stephen Howes, Australian National University

TITLE: The Garnaut Climate Change Review: what shape and prospects for an effective international agreement on climate change?

TIME: 11:30 A.M. -1:00 P.M.

DAY & DATE: Wednesday, 19th November 2008

PLACE: Seminar Room 2, New Building

Abstract:

The Garnaut Climate Change Review -- the 'Australian Stern Review' -- examines climate change from an Australian perspective, but also has important international dimensions. It puts forward the outline of an international agreement on climate change to break the current impasse. What are the critical ingredients, what are the prospects for success, and what would be the implications and incentives for large developed and developing country emitters, including India?
