GUIDELINES FOR REFEREE REPORTS

The course will assign papers which will be required to be refereed. Please submit a referee report (preferably typed in Latex). Here are some general guidelines for writing the referee reports.

1. Length: about two to three pages (it can be more if required).
2. Explain the main result(s) of the paper without using a lot of notation.
3. Give one or more examples (and figures) that convey the main result(s) of the paper.
4. The main idea of the (at least one) proof of the paper should be discussed.
5. Discuss related papers as much as possible.
6. Discuss new ideas and extensions that come to mind.
7. Discuss questions and criticisms about the paper.
